blade, handle or
both.**

Signature Steak Knives International

Signature Steak Knives International produces custom steak knives for high end steakhouses, restaurants, banquet halls and country clubs. We laser engrave the restaurant's name and logo onto the blade and/or handle. SSKI offers two sizes, regular and jumbo and two material types, pakkawood and G10. Several colors are available to choose from.

SSKI knives are made from High Carbon German steel X50CrMov15. The knife is full tang made from 1 pc of steel. Care should be exercised not to use highly chlorinated detergents.

Please note that G10 is a fiberglass like material which is water and heat proof making these knives nearly indestructible.

Pakkawood has a limited life if put in a dishwasher. With hand washing they will last forever.

Shown with Fiber Board Insert

Protect Your Investment with an Anti-Theft Steak Presentation Board with Your Logo

SSKI introduces the solution to eliminating steak knife theft from your restaurant. Our ATSB has a slot which exactly fits our steak knife. The steak gets delivered to the table on the board with the steak knife in its slot. The patron is asked to kindly return the knife to the slot after completing their meal. The bus boy is told that under no circumstances is he allowed to remove the board if the knife is not back in the slot. The insert is suitable for hot steaks but can not be put in the oven. It is completely dishwasher safe. Alternately we can have a stainless steel insert which is oven and dishwasher safe. Your logo can go in upper left corner. In restaurants that have implemented the ATSB, theft has gone to near zero.

Anti-Theft Steak Board

Shown with Stainless Steel Insert
